dung in Sicherheit und Gesundheitsschutz**

## ACTIVE NETWORKING

E|N|E|T|O|S|H

The European Network Education and Training in Occupational Safety and Health (ENETOSH) offers the first and currently the only platform for systematic knowledge-sharing on issues concerning education and training in occupational safety and health.

The network was set up with the financial support of the European Commission as part of the LEONARDO DA VINCI programme from October 2005 until September 2007. The project started out with 13 partners from 10 countries.

Today, almost 60 partners from 23 European countries plus the Republic of Korea and the United States are involved in ENETOSH. The network is coordinated by the Institute for Work and Health of the German Social Accident Insurance (DGUV).

## EXPERT FORUMS

for the various levels of the education system

The idea that safety and health are an integral part of lifelong learning guides the work of ENETOSH, which is why it covers all areas of education, from kindergarten to school, initial vocational training, higher education through to continuing vocational training.

## TARGET GROUPS

- Lecturers and trainers from the accident insurance institutions in Europe
- Educational staff in general and vocational education (staff in crèches, teachers, instructors, university lectures, freelance trainers)
- Multipliers and policymakers (representatives of associations, ministries, social partners, EU Commission)

## OBJECTIVES

Our network activities promote the following

1. Joint quality assurance of education and training on occupational safety and health in Europe
2. High-quality mainstreaming of health and safety into the education system
3. Active knowledge-sharing between the OSH sphere and education experts

## PRODUCTS

### ENETOSH Internet-Platform

More than 600 GOOD PRACTICE examples from Europe and the rest of the world - TOOLBOX with ideas for innovative methods and media • WHO IS WHO with experts in education and training in occupational safety and health • Network connections • Hot topics • Education online • Events and more...

### ENETOSH Standard of competence

The ENETOSH Standard of Competence is intended to assure the quality of instructors and trainers on occupational safety and health in Europe. The standard covers the following fields of competence: Training the trainer - Safety and health at work - Workplace Health Management - OSH management. The ENETOSH Standard of Competence has been recognised by 14 institutions

from 10 European countries and is available in 11 languages. It is a recommendation and can be used by educational institutions for recruitment purposes or CPD for teaching staff.

### Training & Innovation

An international event on innovative topics and methods from all areas of training, held at the "Institute for Work and Health" in Dresden.
