

of the Insurance against Accidents  
at Work and Occupational Diseases

# European Forum Conference 2024

With the focus on opportunities and challenges related to the digital transformation, the European Forum under Croatia's presidency in 2024 continued its mission of advocating for better social insurance practices across Europe by:

Presenting the  
improvement  
of social  
insurance  
systems  
enhanced by  
e-services

Exploring  
artificial  
intelligence  
and smart  
technologies  
to enhance  
health  
services

Discussing  
about the  
dynamic  
world of AI  
ecosystem

Analysing  
risks and  
potential of  
digitalisation  
in education

Emphasizing the importance of cybersecurity measures within social insurances, to ensure the integrity of systems and protection of sensitive information and data

Analysing  
various new  
forms of work  
arising from  
the  
development  
of digital  
technologies

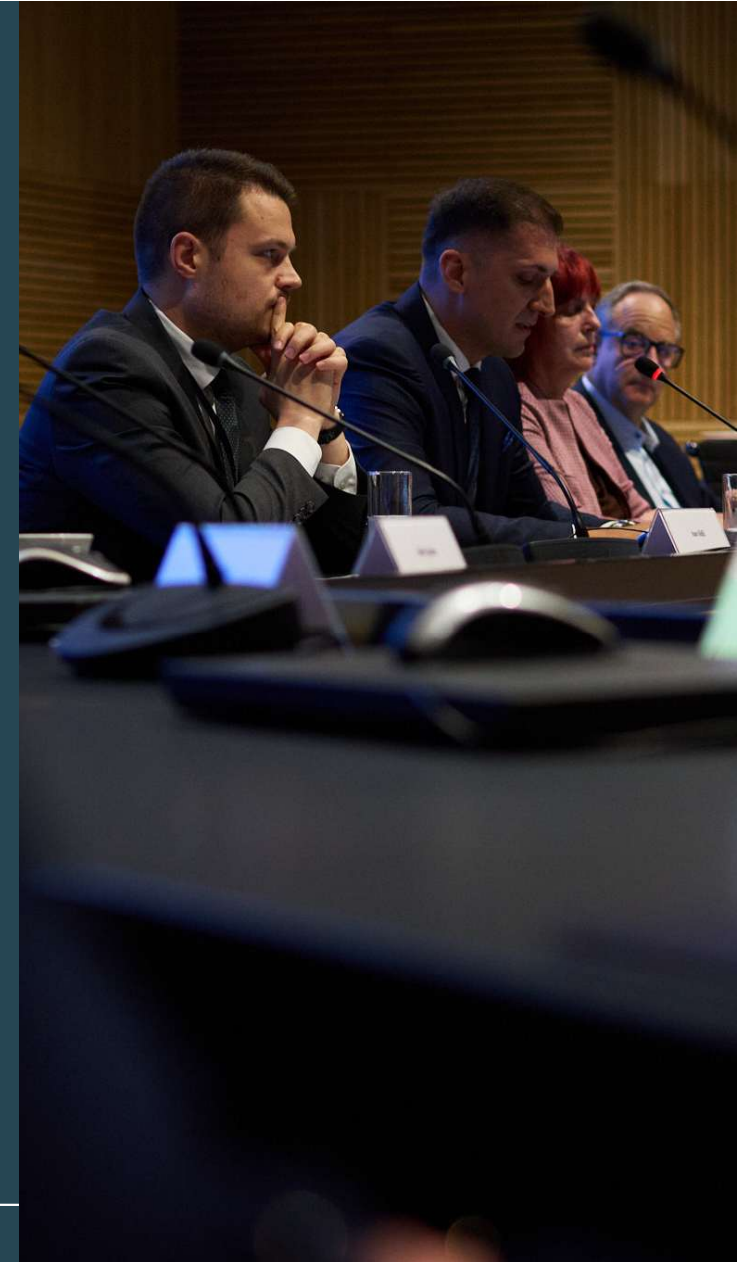

Reflecting on  
digitalisation in  
an ageing  
society -  
providing  
adequate  
social  
protection for  
the future of  
work

Supporting a holistic approach in using digital technologies and innovations in a safe, ethical and health beneficial way

Putting these topics  
into European  
policies context

# The emphasis of the European Forum Conference in Zagreb was on strategic concept based on

Digital Decade  
Policy Programme  
2030

European Strategy  
for Data

Artificial  
Intelligence Act

Platform Work  
Directive

# By addressing these policies issues, the European Forum Conference in Zagreb:

---

1. presented a proactive approach to the modernization of social insurance and healthcare systems to better serve insured persons in a digitally driven world
2. highlighted the importance of ensuring secure handling of sensitive data in an increasingly digital environment
3. underlined the potentials and risks of digitalization and artificial intelligence in education and workplaces, pointing out the need to wisely navigate digital transformation

## By addressing these policies issues, the European Forum Conference in Zagreb:

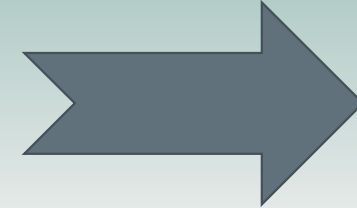

---

4.

addressed modern forms of work and digital labour environments, ensuring inclusivity for all workers, including those in non-traditional employment type

5.

emphasized the importance of technological adaptation and forward-looking policies to enhance workers and students protection in a dynamic and digital - centric era

A priority of ENETOSH is to ensure that mainstreaming OSH into education gets into future strategies at European and national level in both OSH and education

## Summary

One of the most relevant aspects of the Conference was its demonstration of shared vision among European institutions from different countries, sharing best practices and fostering collaborations among institutions and European Forum members.

# Thank you

European Forum Zagreb  
2024 organizing team
